SUMMARY

Full-stack developer with a track record of architecting and shipping production-ready applications using the MERN stack (React, Node, Express, MongoDB). Experienced in designing real-time systems, RESTful APIs, and multi-language code execution pipelines. Strong foundation in DSA (300+ problems) and cross-service architecture. Looking to join a fast-paced product team to build impactful and scalable software systems.

EDUCATION

University School of Information, Communication and Technology **November 2022 – July 2026**
B.Tech in Information Technology (CGPA: 7.6) *New Delhi, India*

Doon Public School **April 2020 – May 2021**
Class 12th - CBSE (Percentage: 87.6) *New Delhi, India*

SKILLS

Languages: C, C++, JavaScript (ES6+), TypeScript, SQL
Frontend: HTML5, CSS3, React.js, Redux, TailwindCSS, MaterialUI, ShadCN, Framer, TanStack Query
Backend: Node.js, Express.js, REST APIs, JWT, WebSockets
Databases: MongoDB, MySQL, Firebase
Developer Tools: Visual Studio Code, Git, GitHub, Google Colab, Postman, Figma, Sentry, Inngest
Coursework: Data Structures & Algorithms, Operating System, DBMS, Object-Oriented Programming

EXPERIENCE

Training and Internship - IBM SkillsBuild (CSRBOX) [🔗](#) | [GitHub](#) **July 2024 – August 2024**
Front End Developer Intern *New Delhi, India*

- Achieved **certification in front-end development** by mastering responsive design and JavaScript frameworks resulting in a **30% reduction in project turnaround time** for website enhancements.
- Collaborated with a cross-functional **team of 5 developers** to design and deploy a responsive, **API-integrated** web application and resolve UI defects.

PROJECTS

CodeMeet | *ReactJS, NodeJS, ExpressJS, MongoDB, Clerk, Stream.io, PistonAPI, TailwindCSS* | [GitHub](#)

- Built a production-grade **full-stack interview platform** (MERN) integrating 4 real-time features (WebRTC video, chat, collaborative code editor, live code execution), **reducing tool fragmentation by 75%**.
- Engineered a multi-language **code execution pipeline** supporting 4+ languages (JavaScript, Python, Java, C++) by proxying requests through **Piston API**, delivering execution results in **under 2 seconds**.
- Architected a **webhook-driven** sync pipeline between Clerk Auth and MongoDB using Inngest, propagating user lifecycle events in real time with **100% data consistency** across 2 services.

HireHub | *ReactJS, NodeJS, ExpressJS, MongoDB, Clerk, Sentry, JWT, TailwindCSS* | [GitHub](#) [Live](#)

- Engineered a **full-stack MERN Job Portal** with role-based access control for candidates and recruiters, implementing **10+ RESTful APIs** for job listings, applications, recruiter workflows, and authentication.
- Built a responsive **React frontend** with job search, filtering, pagination, resume upload, recruiter dashboard, and application tracking, using **Tailwind CSS, React Router, Axios**, and reusable component architecture.
- Integrated an **AI-powered resume analysis** system using **FastAPI, spaCy NLP**, and PDF text extraction to compare resumes with job descriptions and generate **0–100 match scores** for recruiter evaluation.

CERTIFICATIONS

- Lets Upgrade Bootcamp - DSA in C++
- Reliance Foundation - Machine Learning
- IBM - Python for Data Science
- Microsoft and LinkedIn - Career Essentials in Software Development

ACHIEVEMENTS

- Placed in the **top 10%** in competitive programming contests like **CodeClash** and **AlgoUtsav**.
- Solved 300+** DSA problems across LeetCode and GeeksforGeeks.
